

Free Field Days

Compost as a Catalyst for Cropping

A field day demonstrating machinery, alternative fertilisers and soil health.

Green waste from cities and towns is being used to make high quality fertilisers for use in Agriculture.

Spreading of Compost on commercial crops is going to be **demonstrated** in Narromine.

- ✓ See the material firsthand and take samples
- ✓ See spreading machinery in action and talk to the operators.
- ✓ Talk to experts on soil health and how to save on inputs next year.

Featuring a session with Soil Scientist David Hardwick who will help you make better fertiliser decisions to boost productivity when the rains come!!

We know the drought is biting but take a chance to have a bit of time off and see something different that could give you more options.

RSVP to 0427 259 318 or facebook: <https://m.facebook.com/compostasacatalyst>

Wednesday 12th September at Yarrajong, Mungeribar Lane, Narromine

(Hosts: McCutcheon family)

Thursday 13th September at Enza Zaden, 218 Eumungerie Rd, Narromine (Hosts: Enza Zaden)
